Summery

- Frontend Developer with **4.2 years of experience** in building responsive, user-focused, and high-performance web applications.
- Strong expertise in **React.js, JavaScript, HTML5, CSS3, Bootstrap, and Tailwind CSS** for developing modern, scalable UI solutions.
- Skilled in designing **clean, intuitive, and user-friendly interfaces**, ensuring seamless navigation and an engaging user experience.
- Hands-on experience in **component-based architecture**, reusable UI development, and efficient code structuring.
- Proficient in **state management** using **Redux** and **Context API**, enabling smooth data flow and improved application performance.
- Well-versed in **performance optimization techniques** such as lazy loading, memoization, code splitting, and API optimization.
- Experience collaborating with design teams and using tools like **Photoshop** and basic **Figma** to translate design concepts into functional interfaces.
- Strong understanding of **mobile-first design principles**, ensuring consistent rendering across various devices and screen sizes.
- Knowledgeable in **cross-browser compatibility**, ensuring stable and consistent application behavior across major browsers.
- Committed to writing **clean, reusable, and maintainable code** following modern frontend best practices and coding standards.
- Demonstrated ability to work in **agile environments**, collaborate with cross-functional teams, and deliver high-quality features within deadlines.
- Adept at integrating **RESTful APIs** and managing data flow efficiently to build seamless and dynamic user experiences.

EDUCATION

Bachelor of Science in Computer Science

2016 - 2019

Dr. Zakir Husain College, Alagappa University

Experience

VVendu Technology	Mar, 2025 – July, 2025
T.R.S. Forms & Services Pvt Ltd	Aug, 2023 – Apr, 2024
Zak Exhibitions & Conferences Group (ZPRO, Chennai)	July, 2022 – July, 2023
VTM Infotech Pvt Ltd	Jun, 2020 – Jun, 2022

Skills

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript (basic).
- **Frontend Frameworks & Libraries:** React.js, jQuery, Bootstrap, Material-UI, Tailwind CSS.
- **State Management:** Redux, Context API.
- **Version Control:** Git, GitHub.
- **Tools & Technologies:** VS Code, Chrome DevTools, Postman, Figma (basic).
- **Responsive Design:** Flexbox, Grid, Media Queries, Mobile-first approach.
- **Performance Optimization:** Code Splitting, Lazy Loading, Memoization, API Optimization.

Projects

Project 1 - E-Auction / Car Bidding

- Roles & Responsibilities:**
- **Technologies:** HTML, CSS, JavaScript, Bootstrap, React.js, Git, GitHub.
 - Developed responsive, user-friendly UI screens for car listing, bidding, and auction details using React.js and Bootstrap.
 - Built reusable components and managed application state using React hooks and Context API.
 - Integrated REST APIs to fetch car data, bidding history, and user details.
 - Implemented real-time updates for bid changes and improved overall user interaction.
 - Ensured mobile-first design, cross-browser compatibility, and optimized performance.
 - Handled form validations, loading states, and error handling for a smooth workflow.
 - Collaborated with backend team to ensure accurate data flow and API mapping.

Project No: 2 - Forms & Services – Web Application Suite

Roles & Responsibilities:

Technologies: .NET Frontend, HTML, CSS, JavaScript, Bootstrap, React.js, Git, GitHub.

- Worked on multiple enterprise applications, including LMS (Learning Management System), EWMS (Employee Work Management System), and HRMS (Human Resource Management System) for TRS Forms & Services.
- Built and enhanced frontend modules using HTML, CSS, JavaScript, Bootstrap, and React.js to deliver clean, responsive, and user-friendly interfaces.
- Collaborated with the .NET backend team to integrate APIs, validate data, and ensure seamless communication between UI components and server-side modules.
- Improved overall UI performance, implemented reusable components, and optimized layout consistency across all TRS platforms.
- Contributed to dashboard screens, form validations, workflow pages, and user activity modules across LMS, EWMS, and HRMS applications.

Project No: 3 - Multi-Location Events & E-Commerce Website

Roles & Responsibilities:

Technologies: HTML, CSS, JavaScript, Bootstrap, React.js.

- Developed and maintained multi-location event websites for Zak using HTML, CSS, JavaScript, and Bootstrap, ensuring responsive layouts and consistent user experience across all locations.
- Built interactive pages for event listings, registrations, and exhibitor details, improving overall site engagement.
- Worked on e-commerce-related features, including product/catalog pages, forms, and user interaction modules to support online event activities.
- Optimized site performance, implemented clean UI components, and ensured mobile-friendly design for a diverse user base.
